Recess Lighting

This special type of fixture takes away the clutter of regular ceiling lights by replacing surface fixtures, turning any average home into a model home. Use recess lighting in any room to illuminate large or small areas, providing an abundant amount of brightness for any occasion.

Paddle Fans

Ceiling fans bring distinction and comfort to any room and a decreased energy bill! Paddle fans control temperature in a room for much less than any air conditioning and heating system, and may even serve as a room's primary illumination if light is added.

Pendants

Hanging pendant lights create an attractive, decorative look in your home while illuminating the space in any room. Hang a large pendant light in the middle of the ceiling to light up a larger space, or hang numerous mini pendant lights to create an intimate space over a kitchen island or table.

Plugs & Switches

Adding class and style is as simple and subtle as replacing and updating the wall outlets and light switches in your home. By updating the plugs in your home, you create safety for your family and protect your home from power surges and fires.

Landscaping

Landscape Lighting offers a creative method to showcase a home after dark by creating comfort and charm to any element of your garden. Add spotlights to your flowerbeds or pool and create hospitality to any walkway by installing path lights.

Hot Tubs & BBQ

Take this weekend to relax with your family and kick up your feet! Wulff Electric can provide the complete start to finish service of hooking up your luxurious new spa and barbeque. Wulff will obtain any permits and take care of everything so that you have a hassle free installation.

Panel Upgrades

Are your breakers popping? This could be due to an overload in your circuits. If your older home isn't fully equipped with enough power to support your brand new home entertainment system or network of computers, you may want to consider an electrical panel upgrade to expand your circuits so you can run your appliances and even support that new spa or pool you've always wanted.
